

# OXY<sup>TM</sup> 99

Breathe Pure Oxygen

Life Saver

First Aid  
Vitality  
Recovery

Medically Certified

UPTO 150\* INHALATIONS IN EACH CAN

Easy to use & carry.  
Weighs only 100gms.

## OXYGEN

# A LIFESAVER

Oxygen is our primary source of energy and is vital for our brain function. It calms the mind and stabilizes the nervous system. Without oxygen we cannot absorb important vitamins, minerals, and other nutrients that our body needs. When our cells lack oxygen they weaken and die. Without oxygen, nothing works very well or at all.

### WHAT GOES IN

Food + Oxygen  
glucose in the air

### WHAT COMES OUT

Energy + H<sub>2</sub>O + CO<sub>2</sub>  
keeps our water carbon  
body running dioxide

## WHAT DOES OXYGEN SHORTAGE DO TO THE HUMAN BODY

Oxygen shortage in the human body is mainly caused due to respiratory disorders and has also been linked to every major illness category including heart conditions, cancer, digestion and elimination problems, inflamed, swollen and aching joints, sinus problems, yeast infections and even sexual dysfunction.

As our cells grow older they lose their ability to carry oxygen. As the liver ages, it takes increasing amounts of oxygen reserves often leaving the other body systems with an oxygen shortage. Our brains need oxygen the most so when the body is in short supply, our brains suffer the consequences.

## PREVENTION AND TREATMENT OF RESPIRATORY SYSTEM DISORDERS

### HYPOXIA & HYPOXAEMIA

When the body or a region of the body is deprived of adequate oxygen supply at the tissue level.

### ASTHMA

Where a person's airways become inflamed, narrow and swell, and produce extra mucus.

### BRONCHITIS/COPD

Where one experiences inflammation of the lining of bronchial tubes, which carry air to and from the lungs.

### EMPHYSEMA/COPD

Where a group of lung diseases block the airflow and make it difficult to breathe.

### PULMONARY EMBOLISM

Where one or more arteries in the lungs become blocked by a blood clot.

### PULMONARY EDEMA

Where excess fluid in the lungs causes breathing difficulties.

### ATELECTASIS

Where reduced or absent gas exchange leads to the collapse or closure of a lung.

### PNEUMONIA

Where an infection that inflames air sacs in one or both lungs fill them with fluid.

## HOW OXY99 WORKS:

» OXY99 instantly increases the oxygen levels in the body and helps restore the brain and body functions to normal.

## WHY USE OXY99

» OXY99 is a safe and easy to use medically certified oxygen in a can. By inhaling just 5 to 6 short bursts\*, it helps through conditions resulting from low oxygen levels in the body.

## BENEFITS OF OXY99

» Provides intermediate relief by acting as your first aid during emergencies.

» Improves breathing and recovery during fitness workouts, increases athletic sports performance and increase protein absorption in the body.

» Instantly helps to regain energy, vitality, freshness and mental focus after long flights, long working hours, long nights or hangovers.

» Is useful if you suffer from lung or respiratory disorders such as Asthma, C.O.P.D e.t.c.

» Helps you recover from breathlessness & suffocation caused by pollution, smoking, stale air, poorly ventilated rooms, high altitude e.t.c.

## EASY TO USE

Press trigger to spray short burst of oxygen into nose or mouth while inhaling deeply.

Exhale normally and do not hold your breath.

Also connects with a standard oxygen breathing mask  
\*Supplied separately.
